Data Source: Maine Hospital Inpatient Database; Maine Health Data Organization.

Acute Myocardial Infarction Hospital discharges are defined as discharges in which Hospitalization with Acute Myocardial Infarction was the principal diagnosis, ICD-9-CM code: 410.

Crude rates are hospital discharge per 100,000 population.

Age-adjusted rates are hospital discharge per 100,000 population age-adjusted to the U.S. 2000 standard population.

95% CI: 95% confidence interval of the rate.
